

CAR-MON SERIES TLC TELESCOPING DROP

NOTE: MINIMUM DUCT SIZE = 6"

QTY.	MODEL	MOUNT TYPE		A	Car-Mon Series TLC consists of 3 sections, a storage canister of powder coated steel duct, with spun inlet fitting and two sections of flexible hose providing an extended length of approximately 18 feet. Optional extension duct section can be provided for extended length. The complete assembly to be flange connected to saddle assembly or air-flow tee as specified. Crush-resistant EPDM adapter is designed to fit single and most twin tailpipe configurations. When retracted, hose assembly is held in place by a retention sling. Hose drop, adapter, and specified mounting assembly shall be factory assembled, field assembly not acceptable. NOTE: Minimum duct size is 6". Factory reserves the right to change dimensional data without notice.
