

CAR-MON SERIES WX EXHAUST ARM

SERIES WX arms can be used individually with a direct connected CMW fan or with a ducted system for multiple stations and a central fan. An optional receptor light kit and/or fan switch is available. Arms feature 180° rotation when wall mounted, 360° when ceiling mounted. The standard arms are available in 6 or 8 inch diameters and lengths of 7, 10, 12, and 15 feet. Custom lengths, diameters, and articulation requirements are available, consult factory.

SPECIFICATION

Fume extraction arm is to have four articulation joints for enhanced positioning. Aluminum tubular sections joined by unobstructed flex hose connections are to be supported by structural aluminum square tube struts joined by adjustable tension pivot joints with gas spring actuators. The arm is to rotate on a bearing assembly comprised of a non-metallic, lubricative synthetic material. The arm assembly shall be electrically non-conductive to eliminate any chance of conveying current to the duct system and to avoid accidental arcing. Arms are to be ceiling or wall mount and in diameter and length as indicated on drawing and/or schedules. Arms shall be Series WX, as manufactured by Car-Mon Products, Inc., Elgin, Illinois.
